- Programming Languages: Python
- Web Development
- Database Management
- Data Analysis & Visualization
- Machine Learning

PROFILE

Third-year B.Tech AIML student with strong skills in Python, Machine Learning, and Web Development. Experienced in building data-driven projects using tools like Jupyter, GitHub, and Google Colab. Passionate about AI solutions and eager to learn and grow in the tech industry.

PROJECTS

• E-Commerce Website – MARS

- Developed a responsive online shopping platform using HTML, CSS, and JavaScript with product listings, cart functionality, and animated UI for user engagement.

• JARVIS – AI Virtual Assistant

- Created a desktop voice assistant using Python that can perform tasks like opening apps, searching the web, sending emails, and giving weather updates.

• AutoML-Based Model Selector

- Created an AutoML pipeline that automatically selects the best-performing ML model and parameters based on input data characteristics
